

State of the art equipment for high quality sports car exhausts.

TFL Italy is a company specialising in the production of **exhaust systems** for sports cars. At the basis of our achievements there are skills and experience, attention and professionalism. We have the most innovative and cutting edge equipment that allows us to carry out all metal processing in house.

We have machinery for laser cutting of sheet metal and tubes; for punching, bending and calendaring sheet metal; for band and disc cutting.

We use the best tools for TIG and MIG welding and liquid and powder painting. In our design office we take care of rapid prototyping through the use of innovative 3D scanners.

All this allows us to guarantee precise workmanship capable of ensuring resistance and quality.

This allows us to produce exhaust systems for sports cars of all sizes and types, suitable for the best vehicles on the market.

We carry out each job with the utmost professionalism, from design to testing for road homologation.

We value the performance and technical characteristics of sports car exhausts but we do not put design aside.

We don't leave any detail to chance and offer high quality finishes and chrome plating.

TFL Italy offers a wide range of solutions to meet the different needs and preferences of each customer.
